SUMMARY

Senior engineer with 15+ years across frontend and backend, most recently 5 years at Included Health (health tech serving 300+ employers and health plans, including a third of the Fortune 100). Led a team of 4 as Team Lead, owning frontend architecture for the member-facing web app and, over the last two years, full stack delivery across Go, Ruby, and Next.js services — API design, Postgres schemas, CI/CD, and production on-call. Bilingual (English/Spanish).

EXPERIENCE

Team Lead, Full Stack Engineer — Included Health

May 2021 – April 2026 | San Francisco, CA (Remote)

- Led a team of 4 engineers: owned frontend architecture, service boundaries and API contracts, code review standards, and delivery of strategic enterprise client features; mentored engineers toward senior scope.
- Replaced Elasticsearch keyword search with an internal **LLM-powered semantic search** for the Care Coordinator platform, improving relevance when locating providers and clinical content across a large unstructured corpus.
- Migrated the member-facing application from **AngularJS to Vue.js** via a feature-flagged incremental rollout, running both stacks side by side in production while retiring the legacy app route by route.
- Owned full stack delivery across **Go, Ruby, and Next.js** services: designed Postgres schemas and REST/GraphQL contracts, and migrated 3 Ruby services to Go.
- Closed **100+ security vulnerabilities** via a sustained remediation and Dependabot campaign across the monolith, clearing the security review that unblocked a major enterprise client deal.
- Carried production ownership: on-call rotation, incident triage, Grafana dashboards, Rollbar alerting, Docker-based deploys, and feature-flagged releases.
- Built test coverage and CI pipelines (Jest, Cypress, Playwright); refactored the Care Coordinator Chrome extension to raise coverage, enforce linting, and cut JavaScript bundle size.
- Delivered an internal Care Coordinator platform end to end (React, Node.js, Redis, Elasticsearch); migrated analytics from Snowplow to Amplitude, retiring a paid third-party tool.

Software Developer — Velocigo Inc

March 2020 – February 2021 | Tulsa, OK

- Replaced the primary client's Microsoft Dynamics NAV 2009 workflow with a modern web UI, giving operations staff live visibility into data locked in a desktop client.
- Designed a RESTful Go service to extract Jira metadata and generate dynamic reports, plus a Go integration with the Mailchimp API; mentored a junior developer.

Web Developer — TPV.com

February 2019 – March 2020 | Tulsa, OK

- Led the conversion of significant portions of two Laravel (PHP) platforms to Vue.js components, improving load times and maintainability.
- Built reporting APIs and real-time data visualizations (Google Maps, Highcharts, vue-chartjs) used across departments; drove i18n/l10n of the administrative platform.

Web Developer / Webmaster — Institute of Cybernetics, Mathematics and Physics

September 2010 – June 2017 | Havana, Cuba

- Owned the public portal and internal tooling end to end (PHP, MySQL, jQuery, WordPress): custom themes and plugins, SEO, APIs, and internal reporting dashboards.

PROJECTS

- **CiudadanoUSA** (ciudadanousa.com) — Bilingual U.S. citizenship-prep app, live on the iOS App Store with paid Pro subscriptions. Sole owner of product, design, engineering, payments, and launch. React Native, Expo, TypeScript, Supabase, RevenueCat.
- **Renderlog** (renderlog.dev) — Bilingual technical blog on frontend engineering, written from production experience. Next.js/React, self-hosted on a Raspberry Pi 5 behind Cloudflare Tunnel.

SKILLS

Languages TypeScript, JavaScript, Go, Ruby, PHP, SQL

Frontend React, Next.js, Vue.js, React Native/Expo, HTML/CSS, accessibility (a11y), i18n, performance and bundle optimization, feature flags

Backend & APIs Node.js, Go, Ruby, GraphQL, REST API design, schema design, service boundaries, Laravel

Data & Infra PostgreSQL, MySQL, Redis, Elasticsearch, Supabase, Docker, AWS, CI/CD pipelines

Testing & Ops Jest, Cypress, Playwright, on-call and incident response, Grafana, Rollbar, Amplitude

Leadership Team leadership, mentoring, legacy migrations, security remediation, LLM/AI integration

EDUCATION & CERTIFICATIONS

- **B.S. Computer Science Engineering** — University of Informatic Sciences, Cuba, 2010
- [**AWS Certified Developer – Associate, 2026**](#)
- [**AWS Certified Cloud Practitioner, 2020**](#)
- [**Specialized Training in Multimedia & Web Design Technology**](#) — C-DAC / ITEC, Government of India, 2016
